

# Construction fleet management

## On-road or off-road, we've got your vehicles and equipment covered.

Use Geotab to transform your raw vehicle data into informative, actionable reports that help drive ROI – all within a single platform.

### The Geotab advantage

Geotab helps construction fleets meet your operational challenges. Whether your need increased visibility to control equipment theft, reports to monitor and decrease fuel usage, or engine runtime to monitor maintenance, Geotab has a solution.

#### Keep track of your assets

Whether your assets are powered or non-powered, Geotab provides accurate, robust trackers that can withstand rugged construction environments and harsh weather conditions.

#### Utilize your equipment

Maximize your equipment's output – get detailed reports on equipment and vehicle usage to reduce downtime and complete jobs on time and on budget.

#### Stop theft in its tracks

Your equipment is your business. Keep a closer eye on your assets with safety cameras, security alerts and GPS trackers so you don't lose out on costly machinery.

#### Improve worksite safety

Geotab's safety tools and analytics help identify driver coaching opportunities, benchmark your fleet against competitors and send you alerts before collisions happen.

#### Have eyes and ears in the field

Gain more visibility into your operations than ever before. Use the Geotab Marketplace to add cameras, asset trackers, GPS capabilities, sensors and more.

#### Optimize fuel usage

Track your fuel usage and idling times with Geotab's reporting capabilities. Decrease your overall fuel consumption and increase your bottom line.

#### Digitize your maintenance

Telematics provides predictive maintenance analytics so you can stay one step ahead. Everything you need to monitor vehicle and equipment health – on one dashboard.

# The Geotab Marketplace

Geotab's solution is adaptable. It's built on an open platform, so you have more control and flexibility. You can integrate with over 200 marketplace partners to drive efficiency and manage costs across your fleet.

## Features include:

- Asset tracking
- Cameras & ADAS
- Mobile apps
- Fleet utilization

## Telematics: more than just fleet management

A telematics solution goes beyond just basic fleet management. With the right telematics partner, you can optimize your safety, productivity and equipment utilization using digestible, informative data delivered right to you on one single platform.

## Geotab integrated solutions for AEMP data

Integrate AEMP 2.0 data from your equipment – including datasets from Caterpillar, John Deere and Komatsu – into our advanced fleet management software for a singular view of all on-road and off-road equipment within the Geotab platform.

## Geotab's platform provides you:

### GO9 RUGGED

Our GO9 RUGGED is IP68 and IP69K rated – built to withstand the harshest of conditions so you don't need to worry about durability.

### Cameras & ADAS

Capture on-road insights, keep drivers safe and accountable, and protect your fleet from liability with video telematics.

### Asset Tracking

Keep track of important equipment and vehicle information to get real-time visibility into your fleet assets' location, usage and availability.

### Expandability

Use the Geotab software development kit and hardware add-ons to get a completely unique and personalized experience.

### Geotab IOX

Enhance the power of your data by adding Geotab's IOX hardware that supports fleet data collection.
