

# Transform your fleet with Evolectric and Geotab: Evolectric's CircularEV solutions integrated with Geotab telematics

## Evolectric's CircularEV™ solutions<sup>1</sup> feature the GO9 device with MyGeotab, the most advanced telematics platform for optimal fleet performance.

Unlock actionable business insights from vehicle-generated data like GPS tracking, road speed, charging status, energy usage, engine maintenance data, and any potential diagnostic trouble codes to advance your fleet efficiency, safety and sustainability.

### Key features:

#### One unified platform, be it EV or ICE

Manage your entire fleet in one unified platform. Track location, state-of-charge, and charging status at any moment.

#### Ready for activation

With ready-to-go OEM telematics hardware from Geotab installed on all Evolectric vehicles, there are no extra hardware or installation expenses.

#### Immediate state-of-charge notifications

Improve your operations with alerts such as low charge, not charging or completely charged that will help keep your fleet moving efficiently.

#### Proactive maintenance management

Monitor early indicators of potential problems, swiftly pinpoint necessary fixes, and strategically organize maintenance tasks using diagnostic alerts and essential vehicle data.

#### Improved fleet safety

Monitor and manage your vehicles and drivers to improve overall fleet safety. Utilizing MyGeotab, you can access crucial safety metrics and get notified instantly when any safety violations occur.

## Operations

- Track energy consumption
- Monitor EV distance/range remaining
- Ensure charging bay availability with EV range info
- Remote diagnostics for vehicle technical issues
- Route optimization (planned vs. current)

## Productivity

- Streamline EV charging time and energy consumed
- Live tracking for better vehicle utilization
- Integrate cameras video telematics for a comprehensive solution
- Trips and activity reports for trip data

## Sustainability

- Manage EV battery charging
- Monitor charging status during AC / DC charging
- Enhance range efficiency from regenerative braking
- Use temperature insights for EV range
- Utilize charge assurance dashboard

## Safety

- Generate risk and safety reports for safety reporting
- Coach drivers on best practices
- Collision notifications for incident reporting
- Maintain vehicle history log

## Compliance

- Geotab Drive app for drivers
- Vehicle inspection reports
- ELD compliant

## Expandability

- Access partner Add-Ons and solutions through Geotab Marketplace
- Geotab IOX® technology to connect third-party hardware add-ons

The power of Geotab's telematics technology – along with Evolectric's electric mobility solutions – equips fleets with a turnkey connectivity solution that maximizes operational efficiency, reduce downtime and increases productivity. Collect and monitor rich, high-quality data from Evolectric's CircularEV models, all with end-to-end data protection. With ready-to-go factory-fitted GO9 telematics and an integrated MyGeotab fleet management platform, reaching a new level of connectivity couldn't be easier.

<sup>1</sup> Available on all Evolectric models, including the CircularEV™ solutions comprising Circular Electric Vehicles and CircularEV™ conversion kits.
