# One integrated platform for connected and sustainable fleet performance

Geotab Integrated Solution for the Volkswagen Group: Elevate fleet management across Volkswagen, Audi, Cupra, Škoda, Seat, and Volkswagen Commercial vehicles, harnessing insights for enhanced visibility and business efficiency.

With OEM-installed telematics on Volkswagen Group[1] vehicles, view high-quality data insights to help monitor vehicle performance, vehicle status and more. Get centralized access to the connected Volkswagen vehicle data via the MyGeotab platform and the power to analyze for business decisions. Data points include GPS tracking, engine metrics and warning indicators and more for insights on vehicle location, fuel consumption, maintenance and more. This integrated solution does not require any aftermarket telematics hardware for Volkswagen, Audi, Cupra, Škoda, Seat, and Volkswagen Commercial vehicles.

One unified platform

Key benefits:

Integrated fleet management:

Upon request, vehicle data from Volkswagen Group vehicles is funneled to MyGeotab platform for actionable insights on one integrated platform.

Access to data insights based on your needs:

Access broader vehicle data insights based on the feature-rich rate plan.

Cost advantage and remote activation:

No additional hardware or installation expenses, helping save time and money.

Powerful fleet management tools:

Get activity reports, maintenance alerts, energy utilization information and other fleet metrics — for better performance and fleet productivity.

Maximize vehicle uptime:

OEM-installed telematics units on Volkswagen Group vehicles and integration of MyGeotab's seamless fleet management features, helps vehicles operate at their peak utilization rate.

GEOTAB

Productivity

- Vehicle location tracking with GPS data at the time of ignition ON and ignition OFF
- Utilization insights from the Trips and Activity reports
- Better engine utilization for optimal engine life and service time alerts Easy dispatching for better asset utilization

Operations

- Measure and optimize fuel costs with fuel usage tracking
- Streamline maintenance and benchmark fleet performance
- Monitor engine run time and DTCs (diagnostic trouble codes) for optimal performance and proactive maintenance

Sustainability

- Fuel level tracking to optimize operating costs
- Oil change alerts by distance and time, for better vehicle maintenance
- Keep track of range efficiency for EVs

Compliance

- Be compliant with reporting of vehicle usage for personal and business purposes

Expandability

- Access software development kit (SDK) and APIs to develop custom applications suited to your business

The power of Geotab's telematics technology — along with Volkswagen Group owning Volkswagen, Audi, Cupra, Škoda, Seat, and Volkswagen Commercial vehicles — equips fleets with a turnkey connectivity solution that helps maximize productivity and reduces downtime. Collect and monitor rich, high-quality data from Volkswagen Group's range of models, all with end-to-end data protection. With ready-to-go OEM-installed telematics and an integrated MyGeotab fleet management platform, reaching a new level of connectivity couldn't be easier.
